Wash basins and drinking water.--

The "hospital" is a very simple facility - there is no running water... A longterm volunteer nurse is the only medical personnel... Occasionally, doctors will visit to perform physicals, evaluate patients, and so on.

The Sisters demonstrate that these children can be cared for without technology that is beyond the means of their parents...

Many of the older children are orphans - the Sisters often attempt to have these children adopted into the U.S.

Simon has hydrocephalus - he was taken to the U.S. for surgery after being evaluated by American doctors.
